Satellite Summer School to the 7th International Conference on Lévy processes

9-13 July 2013 Będlewo, Poland
Stefan Banach Mathematical International Center

Lecturers:

Víctor Pérez-Abreu (CIMAT)
Nicolas Privault (Nanyang Technological University)
Jan Rosiński (University of Tennessee)
**Zoran Vondraček** (University of Zagreb)

Organizers and Local Organizers:

Krzysztof Bogdan (Wrocław University of Technology)
Zbigniew Palmowski (University of Wrocław)
Kamil Kaleta (Wrocław University of Technology)
Mateusz Kwaśnicki (Wrocław University of Technology)

Scientific Committee:

Víctor Pérez-Abreu (CIMAT)
David Applebaum (University of Sheffield)
Søren Asmussen (Aarhus University)
Jean Bertoin (Universität Zürich)
Krzysztof Burdzy (University of Washington)
Andreas Kyprianou (University of Bath)
Zenghu Li (Beijing Normal University)
Mark Meerschaert (Michigan State University)
Thomas Mikosch (University of Copenhagen)
Ken-iti Sato (Nagoya University)
René Schilling (TU Dresden)
Jerzy Zabczyk (IMPAN Warsaw)

Topics:

Random matrices and free probability, Malliavin calculus for jump processes, analysis and representation of infinitely divisible distributions and processes, subordinators and potential theory.

Sponsors:
