

Perspectives of Modern Complex Analysis

21–25 July, 2014 Będlewo, Poland

Principal themes

- Classical complex analysis and its associated potential theory
- Iteration of real, rational and entire mappings
- Real algebraic geometry
- Spectral theory and mathematical physics
- Diverse subjects centered on analysis

During the conference we will celebrate 60th birthday anniversary of **Prof. Alexandre Eremenko** (Purdue University)

Invited plenary speakers include:

Carl Bender (Washington University in St. Louis)
Walter Bergweiler (Christian-Albrechts-Universität zu Kiel)
Mario Bonk (University of California, Los Angeles)
Walter Hayman (Imperial College London)
Mikhail Lyubich (Stony Brook University)
Mikhail Sodin (Tel Aviv University)
Frank Sottile (Texas A&M University)
Alexander Volberg (Michigan State University)
Katsutoshi Yamanoi (Tokyo Institute of Technology)
Anna Zdunik (University of Warsaw)

Organizing Committee

K. Barański, D. Drasin,
A. Gabrielov, T. Iwaniec,
F. Przytycki, D. Schleicher,
B. Shapiro, M. Shishikura
