

POLISH RETURNS NAWA

WHY JOIN THE POLISH RETURNS NAWA PROGRAMME?

The aim of the Polish Returns NAWA programme is to allow prominent Polish scientists to return to their home country and take up employment in Polish higher education institutions, scientific units or research institutes.

This is an attractive grant offer for Polish scientists residing in scientific centres abroad, which gives them the opportunity to:

- return to Poland and create their own project group
- conduct research under optimal conditions.

Polish higher education institutions and research units may benefit from recruiting specialists with international experience and knowledge in the field of the newest research trends.

WHO ARE THE RETURNING SCIENTISTS?

The programme covers 2 tracks, depending on the stage of the returning scientist's academic career:

- Junior scientist
- Experienced scientist.

The returning scientist may be a person who:

- is a Polish citizen
- holds a doctoral degree (for Junior scientist – obtained not earlier than 7 years before submitting the application)
- has worked abroad as a scientist for the required period specified in the call for proposals and at that time has not lived nor worked in Poland
- can demonstrate scientific achievements that are internationally recognized and stand out in the context of a given discipline and career stage
- managed the implementation of at least one research project selected in a national or international competition (for Experienced scientist).

The programme is open to returning scientists representing all scientific disciplines.

WHICH COSTS ARE FINANCED UNDER THE PROGRAMME?

- Remuneration for the returning scientist
- Remuneration for the inviting person
- Remuneration for the project group
- Adaptation of the workplace
- Relocation of the returning scientist
- Research component financed by the National Science Centre in Poland
